

Converting intellect to asset.™

agileFMS Factory & Manufacturing Solution

In every economic climate, manufacturing organizations such as yours are consistently searching for cycle time and productivity improvements to reduce cost. agileTCP has the optimization expertise and associated tools to guide you in reducing operational costs, cycle times and time-to-profitability within your fabrication facilities. We call that agileFMS.

Effectively reducing your company's manufacturing cycle times and operational costs require the type of thought leadership in which agileTCP excels. Collaborating with our strategic partner Innovo Strategy and select faculty at Harvard Business School, our staff has the expertise to develop and implement solutions to meet your specific needs.

Our agileFMS collaborative service provides dramatic modifications to work-in-progress (WIP), ultimately maximizing throughput, minimizing cycle time and reducing cost. By applying innovative factory modeling and tools to your specific needs, our agileFMS service establishes proper cadence in your factory, significantly improving operational efficiencies. Customized to your exact business goals, circumstances and factory-specific requirements, our agileFMS processes include one or more of the following offerings:

Manufacturing Process Analysis – best of breed analytics to establish the current state of your manufacturing environment

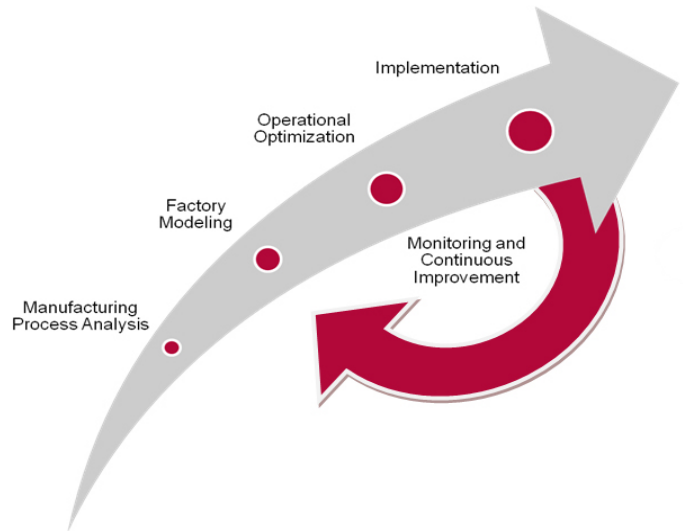

Factory Modeling – customized processes that identify specific areas within your facility for immediate and sustainable cost reduction

Operational Optimization – proven tactics to increase work efficiency and improve cycle time

Monitoring & Continuous Improvement – tools for ongoing improvement and efficiency

agileFMS implementations already underway are producing very effective results, including measurements such as:

- 100.0% ROI within 90 days
- 67.3% reduction in cycle time within 7 months
- 64.4% reduction in scrap and re-work within 6 months
- Net profitability doubling within 12 months

With a combined 150 years of semiconductor and manufacturing experience – including designing, building and operating FABs worldwide – the agileTCP staff has developed knowledge management solutions specific to select industries since 1996. Join many of the largest global semiconductor manufacturers in choosing agileTCP as your knowledge management solution partner-of-choice.

For more information on our expertise in the semiconductor industry or agileFMS service, please contact us today.

about agileTCP

agileTCP (www.agileTCP.com) is a global knowledge management organization based in Austin, Texas that provides technology-driven solutions focused on reducing manufacturing and workforce costs via innovative tools, technologies and methods. Since 1996, agileTCP has been meeting and exceeding the knowledge management and workforce utilization needs of companies worldwide by working with clients to transform, control and package business intellect. Our proven techniques, methodology and subject matter expertise maximize business value for our clients, including increased operational efficiencies of over 80%, reduced training cycle times of over 67% and substantially increased revenue across our client base. For more information on agileTCP, please visit www.agileTCP.com or call 512-732-2223.
