

Converting intellect to asset.™

agileSOLAR Photovoltaic Industry

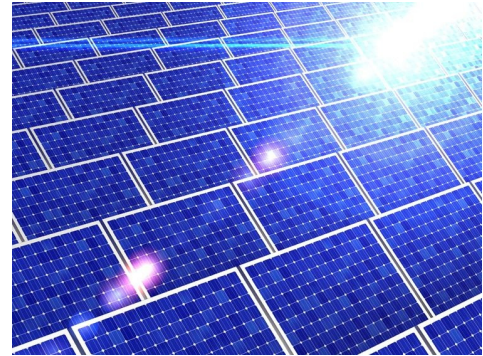

Whether you are in need of gaining greater kWp or higher quality output from your workers, agileTCP has the training and subject matter expertise within photovoltaic (PV) manufacturing to guide you in using knowledge management solutions to reduce operational costs and time-to-profitability for new and unskilled workers. We call that agileSOLAR.

Is your company in need of reducing costs per kWp in a fixed-cost fabrication facility?

Does your company need to more efficiently support complex, expensive module fabrication lines across your own or client lines?

Is your company seeking optimal operational methods and procedures to ensure marketplace competitiveness?

Is your company successfully utilizing unskilled or mid-skilled workers without suffering productivity loss?

Effectively reducing your company's PV manufacturing operational costs to ensure marketplace competitiveness requires the type of technical training, equipment education, software training, and project management training in which agileTCP excels. From increasing the skill level of your workforce to decreasing downtime on highly complex equipment, our staff has the expertise to reduce your overall operating expenses.

Our flexible, customized training solutions are proven to:

- Increase worker productivity by minimizing tool downtime

- Reduce classroom training time

- Aid workers in troubleshooting effectively, thereby using fewer parts

- Reduce unscheduled tool downtime

- Condense mean time to repair (MTTR)

- Increase mean time between failures (MTBF)

- Provide cost effective, time efficient, on-demand training for employees and contractors alike

Using our agileXCDSM content development methodology, our team delivers technical and business/soft-skill training curriculum and content on-time and on-budget for areas of concentration including workmanship, corrective maintenance, preventative maintenance, software, process, and operations. agileTCP knowledge management solutions overcome obstacles such as a lack of travel budget, training facilities, or existing training tools. And solutions can be accomplished with minimal time away from day-to-day operations.

Our personnel are experts in technical training and process automation, among many other areas, and have developed instructor-led and e-learning global training programs specific to select industries since 1996. And agileTCP staff are active in numerous professional organizations, including the American Society for Training & Development (ASTD), Institute for Electrical & Electronics Engineers (IEEE) and the Project Management Institute (PMI). In addition, many personnel serve on Standards boards and frequently present at various industry-related conferences and events.
